Version 1.2
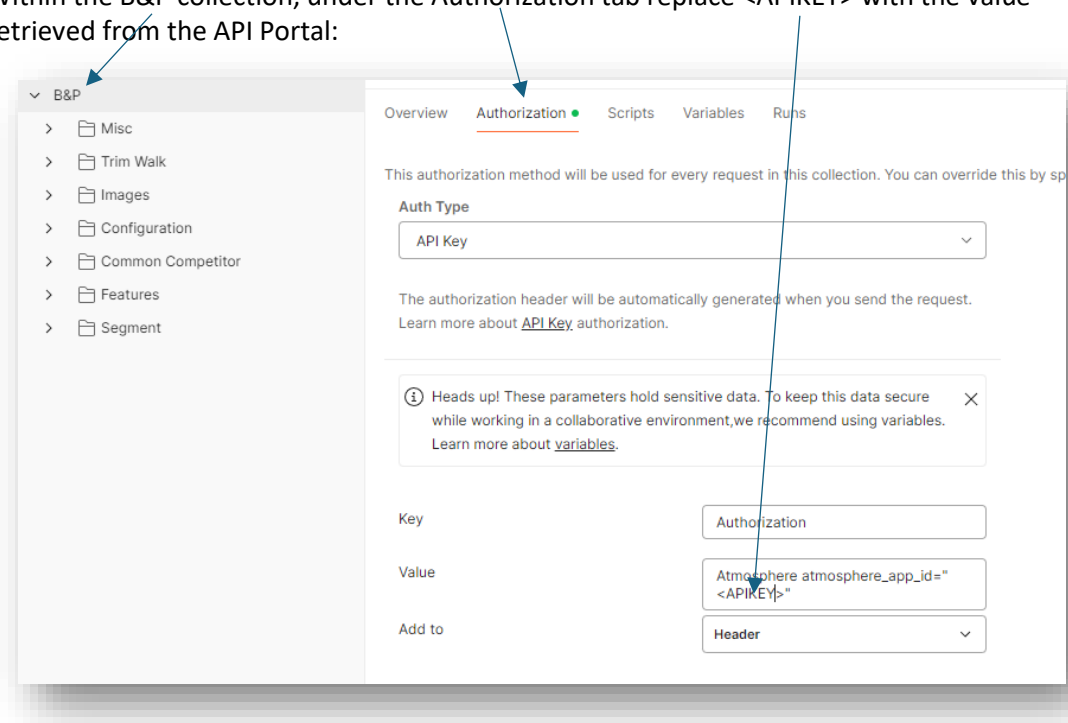

Build and Price Service Start Here

Below you will find some details about getting access to and using the Build and Price Service.

- Access to the Build and Price Service will be given be our API Gateway
- You will receive a welcome email to get access to the API Portal
- Within the Portal you will be able to add additional team members
- The portal will contain your API Key under the "Access" menu item
- This key must be passed in the request header on each request.
- The format for pass the key is:
  - Header Name: Authorization
  - Header Value: Atmosphere atmosphere_app_id="<API KEY>"
- The provided Postman collection is a great place to get started.
  - It is setup so that you only need to enter your API Key once and it will be applied for all calls.
  - Within the B&P collection, under the Authorization tab replace <APIKEY> with the value retrieved from the API Portal:

- Most APIs are self-explanatory. Please reference the following additional documents for a few of the more complex endpoints to get further details
  - Build and Price Service - Configuration Endpoints - How To.pdf
